## Help Prevent Dryer Fires

14,000+ Dryer Fires Reported Every Year  
\$191 Million Annual Property Damage  
30 Civilian Lives Lost Each Year

Source: National Fire Protection Association

Monitor performance data including . . .

- Average & Maximum Cycle Times
- Average Cycles Per Week
- LED Blockage Indicator Status
- Amount of Time Since Last Cleaning
- Estimated Cost to Run the Dryer

## Building Safety & Peace of Mind

Today, owners and tenants can rest easy knowing all dryers in a building are safe. The LintAlert<sup>®</sup> warns of venting problems before they become a danger.

LintAlert PRO Plus calibrates for all run lengths, works with booster fans, reveals actual wci back pressure and shows customers even more usage information.

**Warns when lint buildup is wasting energy.  
Sounds alarm when blockage is dangerous.**

## Smart Homes from Smarter Companies

Calibrate and connect each unit in just 5 minutes to start generating clear information on system performance. Enjoy an easy installation for every unit and capture data to know when service is needed.

## Get Connected

PRO Plus apps and Wi-Fi capabilities allow you and your customers to monitor how safe and efficient the dryer is performing. Users can set automatic email, text and push notification alerts. Your Admin Access gives you visibility into all of your customers' dryer activity and can be used to ensure that every dryer is performing efficiently and safely.

Knowing when normal lint buildup is wasting energy or becoming a fire hazard gives you additional tools to save money on energy costs and can help eliminate restoration costs that would normally result from a fire.

Select the LintAlert to help protect occupants and property from the very real threat of dryer fires.
